

AOSA Digital Mentor Program

Mentorship Program Terms

Those participating in the mentorship program will organize their observations and communications as follows:

1) Initial conversation (via phone or video conference): October
The purpose of this communication will be to provide the parameters of the experience for both mentor and mentee. The goal of the experience will be outlined, and the means of communication will be established, as well as the expected outcomes for both parties.

2) Three to five (or more) discussions and observations: October-April

These observations will include digitally recorded lessons or live observations through internet software followed by a discussion including the mentor's observations and feedback. The mentee will provide a lesson plan or description of objectives to the mentor prior to any discussion of the observation. Suggestions and recommendations will be recorded and goals set for the next observation as appropriate. The observations should take place regularly over the course of the mentorship and conclude by mid-April.

3) Closure Discussion: May

In this conversation, outcomes of the experience will be evaluated by both parties and recommendations made to the mentee for continued exploration and practice.

4) Reflection & Evaluation: May

Both the mentor and the mentee will complete an online evaluation of their experience. The link for this evaluation will be sent via email from the Post Level III Subcommittee.
